DECLARATION OF MARY JOHNSON, R.N., UNDER 37 C.F.R. § 1.132

Commissioner of Patents
and Trademarks
Washington, D.C. 20231

Dear Sirs:

I, the undersigned, hereby declare that I am familiar with the above-referenced invention as claimed in the claims presented in the Rule 116 Response dated September 24, 1996 filed in the above-referenced patent application.

I have been employed as a Registered Nurse in the operating room for over ^{eight (8)} ~~thirteen~~ years. Presently I am O.R. Education Coordinator at the Medical College of Virginia in Richmond, Virginia. My institution is a large inner city hospital with over 25 operating rooms. I am familiar with the invention of Sharon L. Morris, RN mentioned above. In my professional opinion, this device solves the problem of accurate and instantaneous calculation of Estimated Blood Loss contained in sponges during surgical procedures.

This is the only device that I am aware of that automatically computes EBL without manual calculation and weighing of sponges by nurses. In addition, this device, as described in the patent application, should perform this calculation with a high degree of accuracy. This can be important in cases involving small children or infants and in heavy blood loss procedures which use large numbers of soiled sponges. I believe that this device will also reduce blood exposure for nursing personnel responsible for counting and weighing soiled surgical sponges.

The undersigned hereby declares that all statements made of her own knowledge are true and that all statements made on information and belief are believed to be true, and that this
